

**“Utilizing new survey technologies and canopy protection treatments for controlling Emerald Ash Borer”**

Wednesday, December 1, 2010, 11:00 AM (Eastern)

Moderated by Gordon Mann, Consulting Arborist, Mann Made Resources, Auburn, CA  
for more information, please visit [www.unri.org/webcasts](http://www.unri.org/webcasts)

Please plan to join us for the December 2010 UNRI Informational Webcast, which will present new and innovative methods for managing the Emerald Ash Borer (EAB) that are being utilized in Oakville, Ontario, Canada. The webcast will feature a team of speakers and scientists who are working on Emerald Ash Borer identification and protection initiatives in Canada. The web session will outline work that is currently underway in Oakville, as well as feature some interesting work being undertaken by the Canadian Forest Service and its partners. Speakers for this webcast will include: Krista Ryall, Canadian Forest Service; Ian Hanou, AMEC Earth and Environmental Inc.; John McNeil, Town of Oakville; Joe Meating, BioForest Technologies.

The Moderator for the session will be : Gordon Mann, Mann Made Resources, Auburn, California, USA

Please note that this wecast will include a 15 minute Question and Answer period, beginning at 12:00 Noon, following the panel presentations from 11:00 AM – 12:00 Noon. Please plan to attend this timely and informative webcast session, which features a very informed panel of practitioners and researchers who involved in cutting edge management of the EAB.
